Possible Problems: Insect: Aphids, mites, white fly and thrips are possible

Habit: Mounding

Diseases: Rust and powdery mildew are possible

Day Length for Flowering: Long day

Do NOT bury the crown of the plug

## Description

Bright autumn colored stars cover this dense, bushy plant. Fine needle-like foliage is plentiful and gives the plant an overall airy look. Exceedingly attractive to pollinator insects, especially honey bees. Flowers continually change colors, also. Bright lemon gold shifts to tawny orange, then to a blushing pink and coral. Unique among Coreopsis.
