Habit: Clumping, upright

Diseases: The plants can have leaf spot and crown rot if kept too moist

Day Length for Flowering: Long day

Do NOT bury the crown of the plug

Description

This staff favorite was declared a "must have" for container gardening. Naturally compact and branching from the base, this plant would have been a hit with only single flowers, but the extremely double flowers come as a great surprise. Hundreds of petals pack these flowers, in turn, giving this Echinacea a most Marigold-like appearance. The deep, Emerald green eye enhances the flowers and eventually the center gives way to a golden center. 'Sol' is nicely scented, too!
