

Growing Recipe

ECHINACEA PRIMA™ 'SPIDER'

PRIMA™ SERIES

Approximate Finish Time From Liner

 = Minimum  = Maximum

pH: 5.8 - 7.3

Fertilization Recommendations: 75 - 100 PPM

EC: 0.7 - 1.0

Light Levels: Full sun

Water Requirements: Dry moderately between waterings

Hardiness Zones: 4 - 9

Possible Problems: Insect: Watch for aphids, mites, thrips, whitefly and slugs

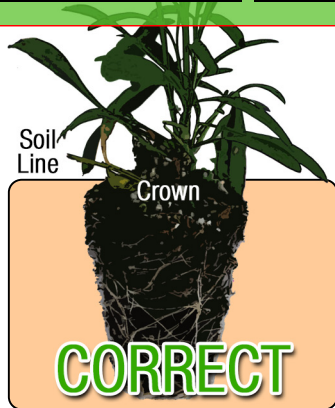

Habit: Mounding, upright

Diseases: The plants can have leaf spot and crown rot if kept too moist

Day Length for Flowering: Long day

Do NOT bury the crown of the plug

Description

Our most unusual Echinacea yet! Brilliant, two-toned flowers have a unique feature that captivates everyone that sees it. Fun, strap shaped petals start off a strong, salmon-rose color that shifts as the flowers get more upturned and "spidery", eventually deepening to magenta, with a violet background.
