

Growing Recipe

GAILLARDIA SUN™ 'STORM'

SUN™ SERIES

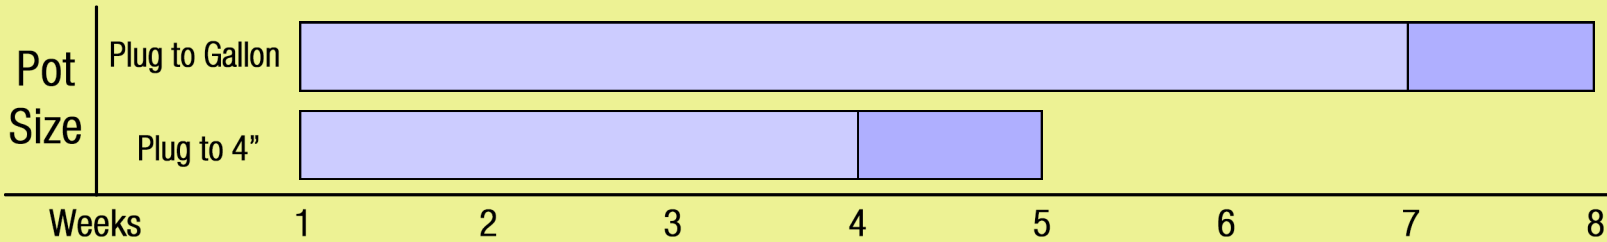

Approximate Finish Time From Liner

= Minimum

= Maximum

pH: 5.5 - 6.2

Fertilization Recommendations: 150 - 200 PPM

EC: 1.5 - 2.0

Light Levels: Full sun

Water Requirements: Dry moderately between waterings

Hardiness Zones: 3 - 9

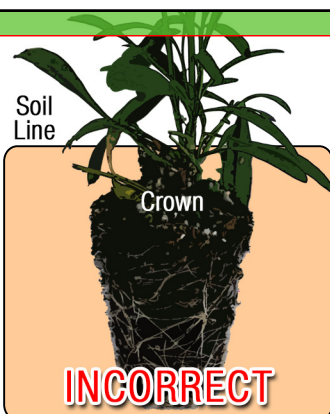

Possible Problems: Insect: No major pests. Watch for snails and slugs
Diseases: No disease problems seen. Watch for mildews, rust, and leaf spots as these are known problems for Gaillardia.

Habit: Mounding

Day Length for Flowering: Facultative Long Day

Description

Searing orange-red, tubular fluted petals tipped with gold pop continually during the high heat of summer. One of North America's favorite native perennials for a good reason. SUN™ 'Storm' has excellent quality foliage that provides the perfect contrast to the continuous flower production.

Do NOT bury the crown of the plug
